WEATHER OF CONCERN

Weather of Concern

- Moderate Santa Ana winds will continue through Sunday with gusts of 30 to 50 mph for the wind-prone areas of Los Angeles and Ventura Counties. These Santa Ana winds combined with humidities in the teens and single digits, along with very dry fuels, will continue to bring the extended period of critical fire weather conditions to much of Los Angeles and Ventura Counties. Extreme fire behavior with rapid fire spread and spotting is possible for ongoing fires as well as for any future fire ignitions.

Active Weather Warnings, Watches and Advisories by County:

- <https://alerts-v2.weather.gov/counties/CA>

WEATHER SYNOPSIS BY REGION

NORTHERN CALIFORNIA

A strong and persistent high pressure ridge will remain over the U.S. West Coast for the next week to 10 days, with little change in general weather conditions expected. The region will be dry and warm with periods of N-E/Offshore winds and only occasional thin high clouds overhead, especially west of the Cascade-Sierra crest. In most areas west of the crest afternoon temperatures will be 5-15 degrees above normal and humidity will be in the 10-25% range. Poor overnight RH recovery will be common. Night and morning N-E/Offshore winds will gust to 20-30 mph in wind-prone areas. The rare extreme locations like Jarbo Gap are seeing morning gusts in the 40-50 mph range again on Sunday, Monday, and Wednesday.

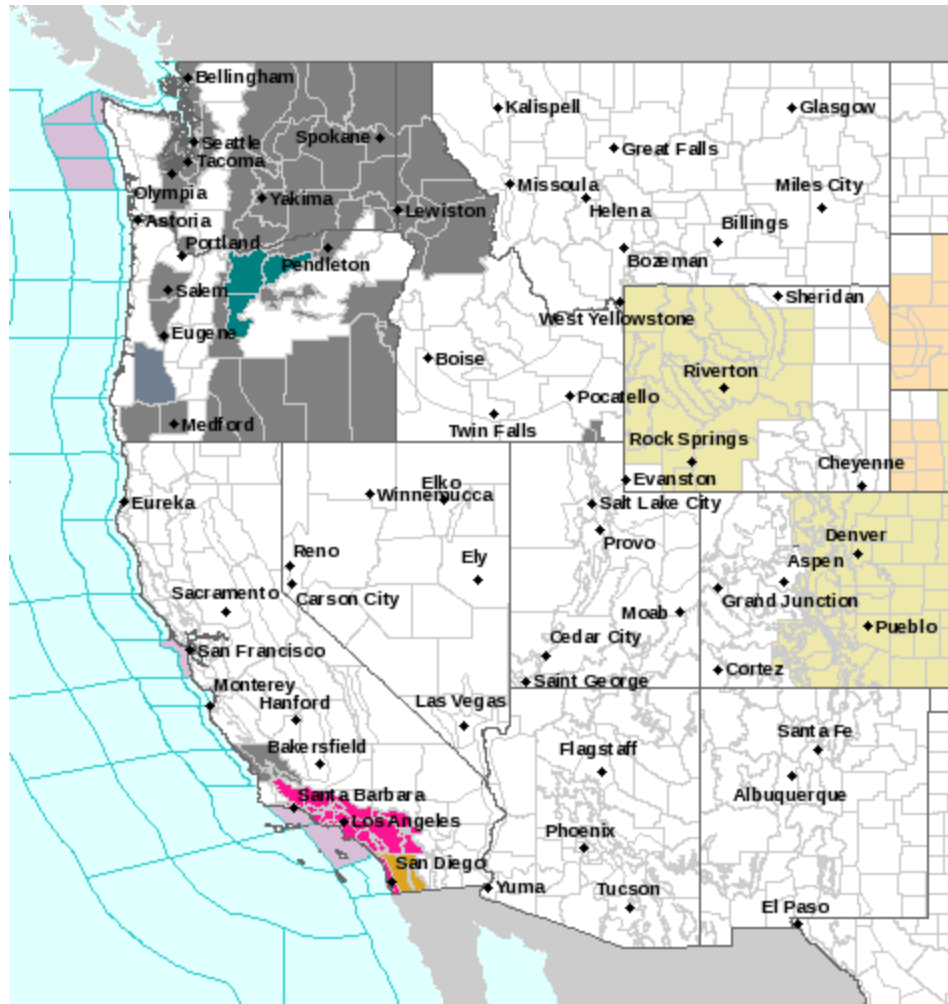

Some canyons and drainages on the west side will be the exception, as strong inversions hold temperatures down and RH up, with only light slope winds. Areas east of the Cascade-Sierra crest will see temperatures a bit closer to normal with somewhat higher humidity with lighter winds.

SOUTHERN CALIFORNIA

Santa Ana Wind Increasing Tonight and Sunday ***Warm and very dry through next week***

High pressure centered over northern California will provide the local region with warm and dry weather along with periods of offshore winds through at least the end of this upcoming week. The next ramp up in Santa Ana winds will occur this evening and overnight, reaching a maximum Sunday morning with speeds in the 20 to 30 mph range, especially across San Diego County. Wind gusts by Sunday morning will exceed 60 mph across the Santa Ana Range and over the Cleveland National Forest. Winds will rapidly diminish Sunday night and Monday with some reversal in winds along the coast on Monday. Winds will be light across the central portions of the state during the next 7 days. Very dry conditions can be expected over all the region with humidity values generally between 5 and 15% over Southern California and 10-25% over Central California. Temperatures will generally be in the upper 50s to upper 60s in the mountains, with 70s to low 80s in the valleys (warmest locations over Southern California). Another surge in winds will be possible Thursday and Friday as a disturbance drops south into Arizona. The anticipated winds over the next 24 hours, and late next week, will not be as strong as compared to this past week.
